The Leader in Soft Cover Tarps for Your Truck!

100%  
Satisfaction  
Guarantee!

**TARPEEZ® is a durable, light weight, water resistant, soft cover tarp that covers your truck bed. It's compact enough to fit under your seat and can be installed in seconds to protect your load.**

**PROBLEM:**  
Regular Tarps Don't Work!

**SOLUTION: TARPEEZ® !**

**TARPEEZ® is held onto the truck with one continuous piece of bungee, and secured by 8 hooks. It can be used when your truck is empty or overflowing and can be attached in a matter of seconds. TARPEEZ stands out from the competition. It's unique design is simpler and more effective. Who wants to deal with the hassle of tying down a tarp or untangling a net? Especially, when neither is guaranteed to be secure. TARPEEZ eliminates those problems and it's easy to use**

**EASY INSTALLATION INSTRUCTIONS:** 1. Clear all sharp objects from top surface of load. 2. Remove tarp from pouch and open across truck bed. 3. Attach large clips over front edge of truck bed. 4. Place one (1) plastic hook into each stake hole (4 each.) 5. Adjust bungee and attach remaining rear hooks (2 each) to bumper area, making sure to cross over tailgate in "X" pattern for added strength and support.

## TARPEEZ® CAN HELP SAVE LIVES.

In the 148 page report that can be downloaded and reviewed online at [www.aaafoundation.org/pdf/vrrd.pdf](http://www.aaafoundation.org/pdf/vrrd.pdf), Peter Kissinger, President and CEO of the AAA Foundation for Traffic Safety, states, "Although vehicle-related road debris (VRRD) crashes are generally less severe than other crashes, individual incidents can be catastrophic." So just how big of problem is VRRD, and do Americans care? According to survey conducted by the AAA Auto Club in South Florida, over 90 percent of respondents indicated that they consider VRRD to be a somewhat serious or a very serious road safety problem. In addition to the crashes and fatalities, VRRD is recognized as a major form of litter on North American roads. Most truck owners are aware of the problem, but seem to feel that they will never be at fault. The AAA report revealed that most accidents from unsecured loads are caused by small amounts of debris, such as sand, gravel, soil, wood products, etc. Small amounts of debris can be deadly at highway speeds. Another alarming fact was that the accidents occurred during short trips. Drivers fail to take the time to properly secure their loads because they perceive the transportation of their load to be a short, low-speed trip. Truck owners need to understand that they are responsible and liable for any damage or accident regardless to the fault or negligence, according to "Absolute Liability", which places an affirmative duty on the operator to maintain their vehicles, their loads and protect public safety.

TARPEEZ® has the solution that all truck owners need to secure their load and protect public safety. It's a durable, light weight, water resistant, soft cover tarp that covers truck beds in a matter of seconds. It's a simple, convenient and easy to use tarp, stated, Dennis Fox, National Sales Manager and TARPEEZ spoke person, in a recent interview. TARPEEZ will "Safely Cover Your Stuff." "It's a product we developed 3 years ago and have been beta testing during the past 2 years. Now that TARPEEZ is patented and perfected we are ready to launch on a national level", said Mr. Fox. "We have placed, sold, and tested over 2,000 TARPEEZ. It's a product that both men and women can easily use to secure their loads." TARPEEZ will kick off their national launch at the SEMA Show in Las Vegas.

**TARPEEZ®**

**Protect your Load, Protect Others and  
Keep America Clean!**
